# Contents

<b>1</b>	<b>Introduction</b> .....	1
<b>2</b>	<b>We Begin with Numbers</b> .....	5
2.1	Sexagesimal Numbers .....	5
2.1.1	Numeral .....	5
2.1.2	Angles .....	7
2.1.3	Time .....	8
2.2	Decimal .....	8
2.3	Irrational; Golden Ratio .....	9
<b>3</b>	<b>In the Beginning</b> .....	11
3.1	Eastern .....	11
3.2	Egyptian's Similitude .....	11
3.3	Greeks' Lever .....	12
3.4	Roman Engineers .....	14
3.5	The First Influencer: Vitruvius .....	15
<b>4</b>	<b>Cathedrals</b> .....	19
4.1	Form Follows Function; Flying Buttresses .....	19
4.2	A Tale of Three Cathedrals .....	21
4.2.1	Milan' Duomo .....	21
4.2.2	Rome's St Peter .....	26
4.2.3	Florence's Santa Maria del Fiore .....	28
<b>5</b>	<b>Ebullitions in Europe</b> .....	35
5.1	The Scientific Revolution .....	35
5.1.1	France: Descarte .....	39
5.1.2	England: Bacon .....	39
5.1.3	Italy: The Linceans .....	39
5.2	Enlightenment .....	40
5.3	Historical Context .....	41

5.3.1	Eighty Years' War	41
5.3.2	Thirty Years' War	41
<b>6</b>	<b>Seventeenth Century Who's Who</b>	<b>43</b>
6.1	Galileo (1564-1642)	43
6.1.1	Physics: Tower of Pisa	43
6.1.2	Astronomy: Dialogues	44
6.1.3	Interlude: Inquisition	46
6.1.4	Methodology: Discourses	46
6.2	Huygens (16239-1695)	50
6.2.1	From Telescopes to Pendulums	50
6.2.2	From Pendulum to Light	51
6.3	Hooke (1635-1703)	52
6.4	Newton (1642-1727)	54
6.4.1	The Mathematician	54
6.4.2	The Alchemist	56
6.4.3	The Elastician?	56
6.5	Leibniz 1646-1716	56
6.6	Bernoulli Family 1654-1782	57
6.7	Jakob Bernoulli (1654–1705)	57
6.8	Euler (1707-1783)	59
6.9	Coulomb (1736-1806)	61
6.10	Navier 1789-1836	62
6.10.1	Formative Years	62
6.10.2	Flexure	63
6.10.3	Elasticity	63
6.10.4	The Bridge <i>fiasco</i>	64
<b>7</b>	<b>Starting with Statics</b>	<b>69</b>
7.1	Statics	69
7.1.1	Strength	70
7.1.1.1	Leonardo (1452-1519)	70
7.1.1.1.1	Wires	70
7.1.1.1.2	Beam strength	71
7.1.1.1.3	Beam curvature	71
7.1.1.2	Galileo (1564-1642)	73
7.1.2	Neutral Axis	73
7.1.2.1	Galileo	73
7.1.2.2	Descartes; 1644	76
7.1.2.3	Mariotte; 1686	76
7.1.2.4	Leibniz; 1684	78
7.1.2.5	Parent; 1713	79
7.1.2.6	1807, Young	80
7.1.3	Flexural Stresses	81
7.1.3.1	Jakob Bernoulli Talking to a Craftsman; 1687	82

7.1.3.2	Euler; 1727	83
7.1.3.3	Coulomb; 1773	85
7.1.4	Shear Stresses	86
<b>8</b>	<b>Some Geometry</b>	87
8.1	Molecular vs Potential Models in Elasticity	87
8.2	Evolute/Involute	88
8.3	Curvature	88
8.3.1	Oresme; 1351	89
8.3.2	Huygens; 1658	90
8.3.3	Newton; 1664	91
8.3.4	Johann Bernoulli; 1691	93
8.3.5	Jakob Bernoulli; 1694	94
8.3.6	Kästner; 1764	96
<b>9</b>	<b>Flexure: Grand Challenges</b>	97
9.1	From Geometry to Calculus	97
9.2	Catenary	99
9.2.1	Early Studies	99
9.2.1.1	Galileo	101
9.2.1.2	Stevin; 1634	101
9.2.1.3	Huygens	102
9.2.1.4	Pardies; 1710	103
9.2.2	Interlude: <i>Funicularia, Catenaria, Velaria, Lintearia</i>	104
9.3	Elastica	104
9.3.1	Jakob Bernoulli’s Challenge; 1690	105
9.3.2	The Three Solutions	107
9.3.2.1	Huygens; 1690	107
9.3.2.2	Johann Bernoulli; 1691	109
9.3.2.3	Jakob Bernoulli; 1691	109
9.4	Moment and Curvature	112
9.4.1	(?)????	112
9.4.2	Jakob Bernoulli; 1692	114
9.4.3	Daniel Bernoulli; 1742	119
9.4.4	Euler’s analysis; 1744	120
9.4.5	Species 1; Hint of Buckling; 1744	125
9.5	Buckling	126
9.5.1	Early Work	126
9.5.1.1	Leonardo	126
9.5.1.2	van Musschenbroe; 1729	126
9.5.2	Euler Comes Back; 1757	127
9.5.3	Conclusion	129
9.6	Unification of the Catenary and the Elastica	130
9.6.1	Anonymous Challenge; 1724	130
9.6.2	Daniel Bernoulli; 1728	131

9.6.3	Euler; 1771 .....	132
<b>10</b>	<b>Emergence of Structural Engineering</b> .....	135
10.1	French Revolutions and the Birth of Modern Elasticity .....	135
10.2	Statically Indeterminate Beams .....	135
10.2.1	Navier, 1826 .....	135
10.2.2	Moseley, 1843 .....	138
10.2.3	Clapeyron, 1857 .....	141

# List of Figures

1.1	Road map to structural engineering	3
2.1	Babylonian mathematics	6
2.2	Hamurabi code (Musée du Louvre)	7
2.3	Euclid’s definition of the <i>extreme and mean ratio</i>	9
3.1	Egyptian geometry	12
3.2	Simple machines	13
3.3	Emblematic Roman constructions	14
3.4	Example of Vitruvius proportionality rules	15
3.5	Anthropometric senses of proportions	17
4.1	Illustrations from de l’Orme [47]	20
4.2	Illustrations from Willis [152]	21
4.3	Thrust load transfer in arches	22
4.4	From the <i>carnet</i> of De Honnecourt [46]	23
4.5	Milan’s cathedral, floor plan	24
4.6	Proportioning schemes for successive designs	25
4.7	Cracked St. Peter’s dome	27
4.8	Polini’s hanging chain analogy [121]	28
4.9	Reinforcement of the dome [121]	29
4.10	Florence’s Santa Maria del Fiore, [131]	30
4.11	<i>Spina pesce</i> and Loxodorme	31
4.12	Santa Maria del Fiore dome construction	33
4.13	Bruneleschi’s ox-driven hoist [78]	34
6.1	Dialogues of Galileo Galilei [60]	45
6.2	Galileo Galilei	47
6.3	Galileo’s Scaling of Bones [61]	48
6.4	Modern examples of scaling	49
6.5	Hooke’s springs	53

6.6	Isaac Newton	55
6.7	Bernoulli's family and friends	57
6.8	Navier's illustration of suspension bridges	65
6.9	Navier and Telford (bridges)	67
7.1	16th-18th centuries; From Natural Philosophy to Science	69
7.2	Main protagonists	70
7.3	Tension studies	71
7.4	Leonardo's sketches on the strength of beams	72
7.5	Leonardo's Codex Madrid, [155]	72
7.6	Galileo's paths toward the seminal cantilevered beam	74
7.7	Galileo's seminal cantilevered beam	75
7.8	Galileo's explanation for beam strength	75
7.9	Deflection of a rigid "masonry beam"	76
7.10	Mariotte's models [67]	77
7.11	Girard's illustration of Galileo and Mariotte's models	78
7.12	Leibniz model	79
7.13	Parent's model	80
7.14	Young's middle third rule	81
7.15	Euler, Bernoulli and Hooke come together [54]	84
7.16	Coulomb's experiments [43]	86
8.1	Elastica; CHECK	87
8.2	Osculating circles of a parabola	89
8.3	Oresme's curvature	90
8.4	Huygens isochronous pendulum [72]	91
8.5	Newton's derivation of curvature	93
8.6	Johann Bernoulli derivation of curvature	93
8.7	Jacob Bernoulli derivation of curvature	95
8.8	Bernoulli's justification for his formula for curvature	96
9.1	Leibniz taking credit for calculus (and denigrating Newton) [86, p. 2-3]	98
9.2	Leonardo's sketches for the catenary from [142]	100
9.3	Catenary; Christiann Huygens [73]	103
9.4	Catenary; Ignace Gaston Pardie, SJ	103
9.5	Elastica; The gentlemen from Basel (Wikipedia)	106
9.6	Jakob Bernoulli's <i>Funicularia</i> challenge [11, p. 219]	107
9.7	Leibniz reply to Huygens, Oct, 1690 [87]	108
9.8	Jakob Bernoulli's <i>Additamentum ad Problema Funicularium</i> [13, p. 288]	110
9.9	June 1691 <i>Acta Erudatis</i> solutions to the catenary challenge of Jakob Bernoulli	111
9.10	Euler's catenary problem WHERE REFERENCED?	112
9.11	J. Bernoulli's model [140]	113

9.12	Bernoulli's posed elastica problem [12, p. CLXX]	114
9.13	Jakob Bernoulli's elastica	115
9.14	Bernoulli's 1694 publication of the elastica.	116
9.15	Huygens's 1694 objection to Bernoulli's solution.	118
9.16	Euler's <i>Methodus inveniendi lineas curvas maximi minimive proprietate gaudentes</i> [51]	121
9.17	Euler's direct method "free body diagram"	122
9.18	Euler's elastica "species" in terms of the load parameter $c^2/a^2$	125
9.19	Compression studies	127
9.20	Euler fixed column buckling [52]	128
9.21	Anonymous note in <i>Acta Eruditorum</i> in 1724, [3]	130
9.22	Daniel Bernoulli and Leonhard Euler 1728 publications	131
9.23	Daniel Bernoulli 1728 incomplete figure	131
9.24	Euler's diagram for the general line stress in a rod [53]	133
10.1	Navier's Leçons at the <i>Ponts et Chaussées</i> [104]	136
10.2	Moseley's 1843 <i>The Mechanical Principles of Engineering and Architecture</i> [101]	138
10.3	Navier's Leçons at the <i>Ponts et Chaussées</i> [105]	141
10.4	Palladio's Four Books of Architecture [112]	142
10.5	Maxwell [97]	143
12.1	Pearson's experimental work in dams [117]	147
12.2	Richardson's finite difference analysis of dam [126]	148
12.3	Goldberg adaptation of the slope deflection for wind load analysis [63]	151
12.4	[Seidel's method of successive approximations [133]	152
12.5	Hardy Cross	153
12.6	Southwell relaxation method [136]	153
12.7	Pilars of the finite element method	155
12.8	Commercial aircrafts in the early 50's	155
12.9	The Delta problem and flexibility based solution	156
12.10	First finite element paper in the history of the FEM	157
12.11	<i>The Finite Element Method in Plane Stress Analysis</i> [31]	160
12.12	Norfolk dam analysis [32] [38]	160
12.13	First nonlinear finite element analysis [153]	161
12.14	First dynamic finite element analysis [154]	162
12.15	Comparison of the force and displacement approaches by [4] (a) and [123] (b, and c)	162
B.1	Stevin	169
B.2	From Aristotle to Newton	170
